

8. Appendix A1

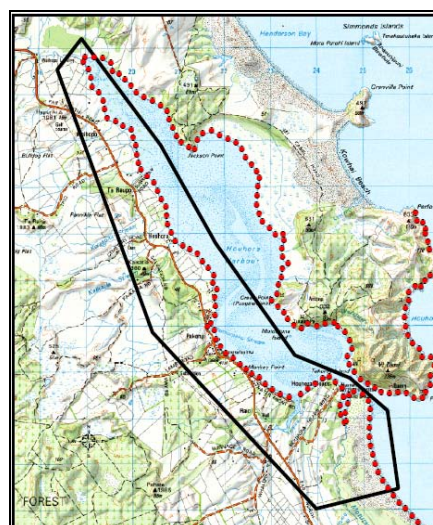

Polygons of Settlements for Analysis of Mean Maximum Wave Height and Water Velocity at Shoreline.

The black polygons represent the boundary used to determine mean maximum wave height and water velocity for each settlement. Location of data points are shown by the red circles. Those data falling within the polygons were extracted and used to calculate means of maximum wave heights and water velocities.

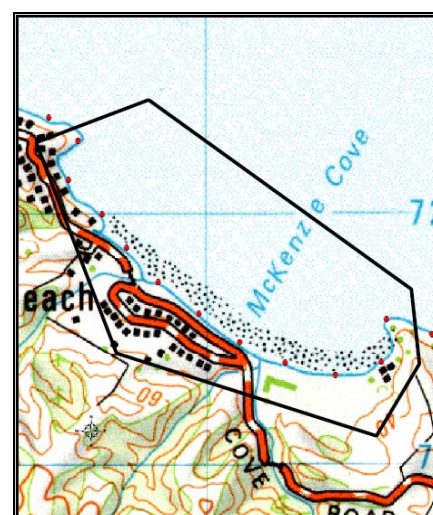

Helena Bay

Houhora

Hihi

Langs Beach

A topographic map of the Omapere area in Botswana. The map shows the Omapere Dam and North Head. The terrain is hilly with contour lines. Place names include Omapere, Omapere, and Omapere. The map also shows the Omapere Dam and North Head. The map is a topographic map of the Omapere area in Botswana.

A detailed topographic map of the Okiato Point area in New Zealand. The map shows a coastal region with several roads, including State Highway 86 and the Oromahoe Road. Key locations marked include Okiato Point, English Bay, Tapu Point, and Opua. A vehicle ferry route is indicated between Tapu Point and Opua. The map also shows a motor camp, a wharf, and a hall. The Whangae Bridge is visible at the bottom. The map includes contour lines, a scale bar, and a north arrow.
